ABOUT

Dental technicians are important members of a successful team in occlusal medicine according to the Vienna School of Interdisciplinary Dentistry. This course has been developed especially for dental technicians, who want to immerse themselves into the "Slavicek concept". The goal of this curriculum is to impart the knowledge and practical methods about different waxing classes

and splints within this concept. This course offers a fundamental base of interdisciplinary working methods and completely new approaches for dental technicians. The balance of theoretical lecture and practical work, guided by the teachers, is the perfect opportunity to work with this gained skills and knowledge in the daily working life.

VIESID LECTURERS

DT Stefan Thunert, MSc

DT Stefan Thunert is a specialist for functional and esthetical dental technology following the VieSID concept in reconstructive dentistry. Since 2000 he owns a dental laboratory and achieved a Master of Science at the Danube University in

Krems in 2011. He joined the VieSID lecturer team in 2014, giving lectures and teaching in workshops.

DT Karin Graichen, MSc

DT Karin Graichen is a highly experienced teacher in dental techniques and joined the VieSID team in 2008. She began to work as a dental technician in 1990, opening her own dental laboratory 10 years later. She now coordinates a large

team of collaborators in her laboratory. Her postgraduate education includes a Master of Science in dental science for dental laboratory at Danube University Krems, Austria.

TOPICS

The curriculum is divided into 3 modules / 3 days each module / total workload of 72 hours

- Introduction and principles of the “Slavicek concept”
