

I° INTERNATIONAL VieSID CONGRESS IN ITALY

ROVERETO (TN) - OCTOBER 14TH 2023

"From classical gnathology to occlusion medicine"

"Knowing occlusion medicine
according to the principles
of the Vienna school of R. Slavicek"

in memory of Prof. Dr. Rudolf Slavicek

Speakers

Dr. Nazzareno Bassetti
Dr. Cinzia Fornai
Dr. Paola Mancia
Engr. Christian Slavicek
Cdt. Stefan Thunert
Dr. Daniele Togni
Dr. Elöd Úry

To register scan the QR-Code

Cdt. Sonia Cattazzo

I am honored to present the first Italian congress on gnathology according to the method of prof. R. Slavicek. The event is the result of a collaboration between Nonsolodenti and the VieSID School of Interdisciplinary Dentistry in Vienna, will feature national and international speakers who are experts in the methodology.

During my training I had the opportunity to get to know and appreciate the professionalism and passion of these instructors, whom I am happy to be able to introduce to all of you today as speakers.

VieSID founded by prof. R. Slavicek has as its objective the study and understanding of occlusion by promoting the development of new technologies that can contribute to the improvement of patient care and health. In this meeting, will be developed the concepts underlying the method, its evolution over the years and the new digital approaches, from orthodontics to prosthetics including laboratory phases.

We look forward to seeing you numerous, as this could be the beginning of a new journey together with us, certainly an opportunity for personal growth and sharing.

A special moment will be dedicated to the memory of prof. R. Slavicek

Dr. Nazzareno Bassetti - Italy

Dentistry 4.0 - Integrating Function and Aesthetics in Complex Cases Using the VieSID and OMRT Bassetti Concepts

1982 Dental Technician diploma CDT. 1988 degree in dentistry and dental prosthetics with high honors University of Sapienza in Rome Italy. 2002 master MSc "therapies for the functionally disturbed craniofacial and masticatory system" prof R. Slavicek, prof. S. Sato and Noshir R. Mehta, Donau University Krems-Austria. 2004-2007 master course "Orthodontics in Craniofacial Dysfunction" prof S. Sato, Donau University Krems-Austria. 2007 title of academic expert in orthodontics, prof S. Sato, Donau University Krems-Austria.

Active member of AIGeDO (Italian association of gnathology and orofacial pain). Ordinary member of AIOP (Italian association of prosthetic dentistry). Member of ITI (International team for implantology).

Independent dental professional in Ascoli Piceno-Italy dealing particularly with orthodontics, prosthetics, implantology and complex rehabilitation of patients with dental dysfunctions, using a multidisciplinary approach.

Dr. Paola Mancina - Italy

"Orthodontics and prosthetics": multidisciplinary approach and operative synergies from daily practice to the most complex cases

Dentist gnathologist kinesiologist. 2005 Degree in dentistry "cum laude" at the University of Rome Tor Vergata. From 2005 to 2014 co-head of the outpatient clinic of Gnathology of the Hospital "Fondazione Don Carlo Gnocchi Onlus" in Rome. 2009 Post Graduate course "Core Curriculum" Donau Universität Krems-Austria Prof. Rudolf Slavicek. 2010-2017 Post Graduate course "Orthodontic in craniomandibular dysfunction" Prof. Sadao Sato - Vienna School of Interdisciplinary Dentistry. Since 2017 Faculty member of VieSid "Vienna school of interdisciplinary dentistry", teacher and tutor in the courses "Basic Curriculum" and "Postgraduate continuum Orthognatodontic Clinical Course" (concept Prof Sato) at VieSid Vienna Austria. 2021 Training course in Postural Kinesiology Sikmo School Rome.

2022 Member of Sikmo GME Italian Society of Medical and Dental Kinesiology Gian Mario Esposito.

Cdt. Stefan Thunert - Germany

Functional dentistry in the dental laboratory - possibilities and necessities combining digital and „old fashion“ approaches

Dental technician since 1991, working in different well known dental laboratory's and dental offices. Own laboratory since the year of 2000. 2001 - 2005 International lectures for Authentic - press-able Ceramic system. 2001 starting with education with the Slavicek Concept.

2011 University of Krems / Austria, degree M.Sc., direct educated by Prof. Slavicek.

2013 - today international lecturing for VieSID

Dr. Elöd Úry - Hungary

Clinical consequences of a wrong terminal hinge axis

1993 University degree in dentistry – Semmelweis Medical University, Budapest, Hungary. 1996 Opening of ConfiDent Dental Office, Sopron, Hungary. 2004-2007 MSc in Dental Sciences: Therapies for the functionally disturbed craniofacial and masticatory systems, Krems, Austria. Since 2007 VieSID international lecturer. 2010-2013 Orthodontics in Craniofacial Dysfunctions, VieSID, Vienna, Austria. 2013 - Doctoral Program in Natural Sciences and PhD, Program in Life Sciences, Biology, Vienna University, Department of Anthropology, Vienna, Austria. Focus on Scientific and Clinical Activities: the mandibular guiding systems, the transverse horizontal axis of the mandible, maxillomandibular relationship record methods, reverse engineering in dentistry.

VieSID representatives

Dr. Rudolf Slavicek
Engr. Christian Slavicek - Austria

Occlusion medicine in the digital dental environment

Rudolf Slavicek (1928 – 2022) based his work on his profound understanding of the stomatognathic system and its functions thus promoting a holistic and interdisciplinary clinical approach in dentistry. As a medical doctor specialized in prosthodontics, he was trained to observe the patients as individuals changing and adapting through time and in continuous exchange with the environment. Hence, he was aware of the necessity to perform a comprehensive evaluation of the patient's physical and emotional statuses, and carried out an accurate morphological and functional assessment of the masticatory structures before setting a diagnosis. He worked enthusiastically to advance diagnostic methods and techniques, including muscle palpation, and cephalometric and condylographic analyses. Thanks to his fine appreciation of occlusion, he developed guidelines for individualized treatment.

Professor Rudolf Slavicek's diagnostic and treatment concepts are now taught worldwide by the Vienna School of Interdisciplinary Dentistry – VieSID, a not-for-profit organization devoted to education and research in occlusion medicine that he founded in 2008 and has been directed by his son, Christian Slavicek, since its origins.

VieSID collaborates with internationally renowned independent experts and lecturers, spanning from Latin America to Canada, Europe, Russia and China.

Dr. Cinzia Fornai - Austria - Italy

VieSID research: advancement of occlusion medicine

Cinzia Fornai is an evolutionary anthropologist with a keen interest in the human craniomandibular system, its functions and pathologies. As scientific coordinator of the Vienna School of Interdisciplinary Dentistry - VieSID, her goal is to explore all clinical and scientific aspects that will lead us to a better understanding of the stomatognathic system. Via her scientific work, she intends to support clinical activities as well as education in dentistry.

The quality of her work reflects in her scientific publications in high-impact peer-reviewed journals. She also benefits from affiliations to various academic institutions with which she collaborates closely, such as the Clinical Research Center, University Clinic of Dentistry, Medical University of Vienna, Austria; the Department of Evolutionary Anthropology & Archaeological Sciences and Human Evolution (HEAS), University of Vienna, Austria; and the Institute of Evolutionary Medicine, University of Zurich, Switzerland.

Dr. Daniele Togni - Italy

Occlusal medicine according to R. Slavicek: clinical implications

Dr. Daniele Togni graduated in Dentistry in 1988 from the University of Milan.

In 2011 he obtained the Master of Science degree at Danube University Krems Science with a thesis on the "Virtual Articulator in the CAD environment".

Since 2016, he has been a VieSID lecturer at the University Clinic of Vienna and since 2017 has joined the scientific research group of the association of the same name. Within VieSID he also holds the position of head of the organization of teaching materials. Convinced believer that modern dentistry cannot disregard an 'adequate knowledge of gnathology, he fully shares the clinical holistic view of Prof. R. Slavicek.

VieSID courses taught by him encompass the theoretical, clinical and practical aspects of the method according to Slavicek and are aimed at dental professionals specialized in the various fields of dentistry and dental technicians.

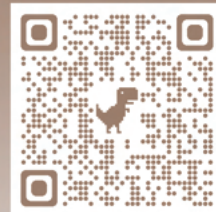

Dr. Daniele Togni works as a freelancer in his private studio in Lecco.
